

Ferrari

Date of Job: **06/04/1987**

Make: **Ferrari**

Model / Chassis Number: **166 F2**

Customer: **Tony Wang**

Having visited Stafford with Adrian Hamilton and Doug Nye to view the car, Adrian sold it to Tony Wang, and I restored it. I had to return to Stafford to collect everything. The car was completely dismantled and it was in a very bad state. The chassis engine bay was misaligned and shortened after a different engine had been installed. Much research was needed to reposition cross members and rectify considerable damage. The engine was a challenge as many parts were either missing or in a poor state. However we finished this. I found an original and very rare Weber carburettor. The chassis restoration was completed and suspension and wheels fitted for transport to Shapecraft in Northampton for new bodywork with information from many photographs. The car was finally assembled and body painted.

Bodywork nearing completion at Shapecraft.

Final assembly of chassis.
